

BAMBOO

Bamboo Fibre Straws

100% Biodegradable

In under 250 days, BAMBOO straws will completely biodegrade into the natural environment. And our straws don't cause soil or water pollution.

+100°C
-20°C

Durable & Heat Resistant

BAMBOO straws are tested and certified to withstand temperatures ranging from -20°C to above 100°C. So, our straws won't deform or soften in hot or cold drinks.

Home and Garden Compostable and Safely Combustible

BAMBOO straws are certified home and garden compostable. Our straws are also toxin-free, so users can discard them into trash cans or burn them. They won't release harmful chemicals into the air or soil.

Low Carbon Emissions— Our Corporate ESG Strategy

Using bamboo enhances sustainable carbon sequestration and combats global warming. In addition, our low-temperature drying process is pollution-free and controls carbon emissions.

Straw
Ø6 x 220mm

Shakey
Ø8 x 220mm

Smoother
Ø10 x 220mm
